

ABOUT US

Created by inventor and entrepreneur Albert Harlow—holder of multiple patents and founder of several tech ventures—PuttOnce™ reflects decades of experience building and launching innovative technologies. While Albert has personally invested in its development, he knows that successful products require more than capital. The goal is to collaborate with the right partner—someone who brings strategic insight, shared vision, and long-term commitment to take this innovation to market through licensing.

WHY IT MATTERS

40% of strokes in a typical round come from putting

- Most golfers rely on visual guesswork—PuttOnce™ brings precision
- Combines slope, pace, and line into one real-time read
- Trains your eye, builds confidence, and lowers scores
- Perfect for golfers, instructors, and golf tech innovators

DESIGNED FOR PRECISION. BUILT TO LICENSE.

PuttOnce™ is compact, portable, and fits in the palm of your hand.

- It delivers instant green reads using a laser and dual-sensor system.
- The mobile app (in development) adds coaching, tracking, and performance insights.
- Two product versions are planned:
 - Mini model – LED display only
 - Full-featured model – with full app integration via Bluetooth

INVESTOR OPPORTUNITY

We're not building a brand—we're building a licensing-ready product.

Our roadmap:

- Complete prototype
- Validate performance with golfers & instructors
- Secure licensing with a top global golf brand

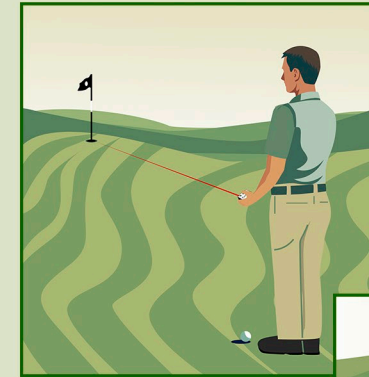

We expect strong interest—and potentially a bidding war—for exclusive rights.

While no returns are guaranteed, our goal is to deliver a 10x return for early investors within 24 months through a licensing deal.

Prototype → Validation → Licensing Deal
The path is clear. The opportunity is real.

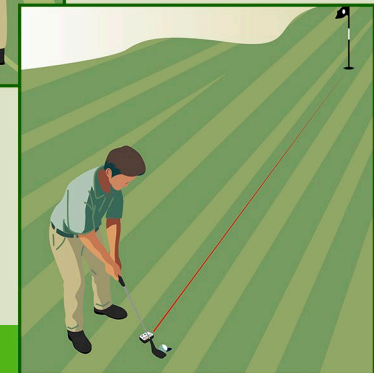

GET READY WITH US

PROTOTYPE > VALIDATION > LICENSING DEAL
THE PATH IS CLEAR. THE OPPORTUNITY IS REAL.

Reads the green in under 5 seconds.

Greens reading, made simple.

STEPS TO FOLLOW

Step 1: Stand behind your ball. Aim PuttOnce™ at the hole. Keep it level and press the button.

Step 2: Place the device near your ball. It shows slope and pace using LED lights and app integration via Bluetooth.

**A SMART, LASER-GUIDED PUTTING AID FOR
THE MODERN GOLFER**

PuttOnce™ is a compact, AI-powered putting aid that solves golf's toughest challenge: reading greens. It uses a laser, twin sensors, and real-time software to analyze slope, pace, and distance—delivering confident reads in seconds. Patent pending and engineered for accuracy, PuttOnce™ eliminates guesswork

NO OTHER DEVICE

**TRAIN YOUR EYE.
TRUST THE TECH.**

**BUILT FOR INSTRUCTORS,
COMPETITORS, AND
GOLF TECH PIONEERS**

**FUNDING
GOAL: \$250,000**

To complete the prototype, field-test it with golfers and coaches, and position PuttOnce™ for a licensing deal with a top global golf brand.
